

When it comes to the Esports scene there are various criteria that a video game must meet in order to make it viable. The top three criteria are competitiveness, viewership, and funding. **Here is a study of mine on different games.**

⚙ Name	# 2021 prize money	# Average Monthly Players	# Concurrent players	# twitch viewers	# growth Feb 21- Feb22	Σ influence index	Σ pro players' growth
🏆 CS: GO	\$21,171,751.00	36,000,000	740000	128,000	4%	77	-19%
📱 PUBG mobile	\$17,674,118.00	530,000,000		1,500	15%	76	-83%
🎮 Fortnite	\$9,469,733.00	270,000,000	2000000	140,000	5.2%	73	-77%
🏆 League of Legends	\$7,820,971.00	125,000,000	2300000	210,000	15%	72	-40%
🛡 Rainbow Six Siege	\$6,219,503.00	65,000,000	75000	10,800	-31%	71	-46%
🚀 Rocket League	\$4,988,771.00	95,000,000	57000	7,900	1%	71	91%
🏆 Apex Legends	\$4,351,007.00	120,000,000	110000	83,900	18%	70	-73%
🏆 Arena of Valor	\$14,430,968.00	15,000,000		242	16%	69	4%
📱 Call of Duty Mobile	\$3,057,280.00	55,000,000		482	23%	69	
🏆 Dota 2	\$47,773,515.00	2,500,000	450000	57,300	-4%	65	-31%
🏆 Valorant	\$6,532,476.00	15,000,000	500000	181,000	19%	65	
🏆 PUBG battlegrounds	\$16,031,339.00			28,800	17%	58	-64%
🏆 Overwatch	\$4,663,280.00	6,500,000		11,000	15%	58	-43%
🏆 HearthStone	\$2,939,891.00	3,800,000		25,300	-26%	55	-46%
🏆 Call of Duty Warzone	\$6,121,202.00			35,700	17%	54	
🏆 Starcraft II	\$1,629,352.00	240,000		2,500	22%	51	-42%

the table is ordered in descending order with respect to the influence index calculated in the following way

$$\text{round}(35 / (1 + \text{pow}(e, -(\text{prop}(\text{"Average Monthly Players"}) / 1e+7)))) + 40 / (1 + \text{pow}(e, -(\text{prop}(\text{"twitch viewers"}) / 1e+7)))) + 25 / (1 + \text{pow}(e, -(\text{prop}(\text{"2021 prize money"}) / 1e+7))))$$

StarCraft II is pretty much the worst investment you could ever make:

- 1) Blizzard Entertainment has confirmed it's stopped development on 15 Oct 2020
- 2) The game has a high barrier to entry
- 3) Pros are leaving the game
- 4) Few people are streaming it on twitch
- 5) Prize money is dropping
- 6) Seems to be growing but probably
- 7) Not appealing or known among young gamer

I'm not quite sure about the growth rate, I could not find reliable data on the web, however, research on google trends makes it seems that its days are pretty much over.

Better options, as the table shows are CS:GO, LoL, Fortnite or PUBG mobile.
